N3IC Field Day 2017 Bonus Points

100% Emergency Power. Gasoline generator, batteries, and solar cells. No commercial power was used.

Media Publicity. An attached press release was emailed to a local newspaper.

Public Location. We were located in Washington Monument State Park, a recreational area which was in active use by the general public during Field Day weekend.

Public Information Table. ARRL material was displayed and explained to all visitors who stopped by, including Appalachian Trail hikers. Part of the public information included was that this was an emergency communications exercise and that we had been doing this for 47 consecutive years. A visitor's log was kept (35 people).

NTS Message to ARRL SM. Attached

W1AW Field Day Bulletin Received: next page

Formal NTS Messages handled. Attached

Natural Power. Initially discharged batteries were charged with solar cells and subsequently used for the following contacts:

50 MHz SSB: K3EW K8EP K3MEC W3AO W4VA W3CWC

Youth Participation Bonus: Aiden, Avi, Ethan, Evan, Mac, Mason, Nick, Paul, Preveer, Rory, Frank, Hayden, Ben, Benjamin, Boone, and Dylan were members of a Boy Scout group who visited; they each made one contact on our GOTA station.

GOTA Bonuses: W3MIT 100; Logan Miller 20

Radio Club Participates in "Field Day"

The Randallstown Amateur Radio Club took part in an annual national emergency preparedness test on Saturday and Sunday, June 24th-25th. The club was founded in 1970 with the opening of Randallstown Senior High School. Over the years the individual members have gone their separate ways and spread out across the country, yet a core group of the original "hams", joined by others attracted to the club, have gotten together every year to participate in the American Radio Relay League's Field Day activity. The annual event has become somewhat of a reunion, being the only time many of the group see one another any longer. This year marks the forty-seventh consecutive year the group has operated the event, and members from California, Florida, Pennsylvania, Virginia, and Maryland were on location.

On the Field Day weekend, thousands of Amateur Radio operators in the U.S. and Canada set up their stations in the open using only emergency power and portable antennas. They contact as many operators as possible in the 24-hour period. These tests are designed to help hams refine operating skills so necessary during disasters and times of emergency when normal channels of communication are disrupted or unavailable.

This year the local club again set up operations in Washington Monument State Park, west of Frederick, at an elevation of 1830 feet. They always seek out high spots in order to strengthen communications -- the group made thousands of contacts with similar groups around the country.
